Re: Notice of Ex Parte Contact
GEN Docket No. 90-314

Dear Mr. Caton:

Telocator, by its attorneys, hereby files an original and one copy of a notification of an ex parte contact in GEN Docket No. 90-314. At 11:30 a.m. on January 14, 1994, Richard E. Wiley, R. Michael Senkowski, Thomas A. Stroup, and Mark J. Golden met with Chairman Reed Hundt and Attorney Advisor General Karen Brinkman at the Federal Communications Commission to discuss issues raised in the attached document.

If any questions should arise concerning this notification, please contact the undersigned at (202) 828-4987.

Respectfully submitted,

Lauren A. Carbaugh

The Economic Impact of PCS

-  New PCS services are expected to create 300,000 new jobs over the next 10 to 15 years.
-  \$300 billion in new sales are expected to be generated by PCS.
-  PCS services can improve American productivity 20-40%.

Telocator's Commitment To Public Health And Safety

LifePage, a service of Telocator's Science and Education Foundation, provides free pagers and paging service to patients registered for an organ transplant.

- LifePage has meant freedom and hope to more than 50,000 patients who have participated in the program since its foundation in 1983.
- Vice President Albert Gore, Jr. has played an active role in the development of the program and has continued his leadership role as the keynote speaker at the LifePage 10th Year Anniversary Dinner at Telocator's 1993 annual convention.
- LifePage is made possible by the generosity of more than 400 paging companies, equipment manufacturers, and contributors in all 50 states and Puerto Rico.

Telocator's Commitment To Public Health And Safety *(Cont.)*

Demonstrating their commitment to resolving important E911 issues, Telocator, the National Emergency Number Association (NENA) and the Association of Public-Safety Communications Officials (APCO) have agreed to work jointly on a broad range of technical and consumer issues regarding PCS access to emergency service providers, including:

- Ability to dial 911 without restriction from any PCS terminal;
- Call control or call back capability;
- Proper Public Safety Answering Point (PSAP) routing;
- Hearing impaired and TDD access; and
- Caller location information.

Key Telocator Recommendations

-  **Competitive Bidding:** With billions of dollars at stake, auction procedures should be simple, workable, and allow sufficient time for auction participants to make informed decisions through open bidding. The auction process should deter speculative abuses and ensure qualified bidders.
-  **Regulatory Parity:** Functionally equivalent services competing in the same markets should be subject to the same regulatory rights and obligations. With the multiplicity of service providers, competition, rather than regulatory intervention, should govern the burgeoning wireless communications marketplace.
-  **PCS Reconsideration:** Telocator's broad-based membership of both existing and emerging PCS interests agrees that a number of technical rules contained in the FCC's Second PCS Report and Order must be modified to greatly facilitate the expeditious deployment of economic and high quality wireless PCS systems and devices.
